As part of the AutoCAD program, a DXF viewer, AutoCAD DWG to DXF, is part of the CAD suite. This viewer allows importing and exporting drawing information in DXF format, which is the format used by Microsoft's AutoCAD. Formats of choice for CAD data interchange, CAD systems should be able to read and write the native formats of the application. The following table shows the native file formats of AutoCAD systems: { | class="wikitable" ! CAD system ! DXF ! Back in February, the Supreme Court issued a short notice announcing that it would hear the case brought by Kesha's former producer, Dr. Luke against her. In August, the two parties reached a confidential settlement and the Supreme Court took no action on the matter. Now, Sony Music and Kesha's management team has announced that the case will be heard on September 4th, 2019. The case is about whether Dr. Luke can legally use the name "Kesha" because he originally recorded the song "Tik Tok" when she was 15 and signed a contract with Sony that allowed her to take all of his credits as a writer. Kesha says that she was never told about the contract. When she was a teenager, she was abused by Dr. Luke and says that he manipulated her into signing the contract. The case also involves her contract with Sony, which she says that she was coerced into signing and forced into giving her the opportunity to sign it. She claims that the contract gave Sony the right to essentially take away her artistic control and the right to her own name. As a result, Dr. Luke and Sony filed a motion to dismiss the lawsuit. The motion to dismiss is basically an attempt to assert that Kesha has no legal right to use her own name because she has no contract with Sony. Kesha's lawyer counters by saying that she can't be forced into signing a contract that she didn't know was there. The Supreme Court will make a final decision about the case before its next term begins in October.Q: django 2.2.4 unable to update content_type field in the admin I am using django 2.2.4 and I have a model
