General AutoCAD 2010 introduced the Architecture Components. These are added as part of the core editing environment. Additionally, AutoCAD 2010 added aspects of architectural drafting that make architectural design more effective, whether the design is for a building or bridge. Structure drawings are similar to architectural drawings in that they are used for structural design, as well as architectural drawings. They are also similar to civil engineering drawings in that they have limited capabilities for proportional drawing of dimensions. Software VectorWorks Architect, a free 3D architectural CAD tool based on AutoCAD, introduced in 1999. In 2013, VectorWorks Architect 7, the first released version since 2007, is made available as a perpetual "evaluation copy". VectorWorks Architect 7.3 is the newest version in the series of Architect 7. VectorWorks Architect 2007 became the first Autodesk® program to support native CNC and sheet metal routing, along with the creation of 3D models, 2D drawings, 2D views, 3D views, presentation decks, symbols, and components.

VectorWorks Architect is an integral part of the VectorWorks product family, the Autodesk product line for the architecture, engineering and construction markets.
