Focal Plane Graphics Pipeline (FPGP) This technology allows direct transfer of the graphics pipeline of a digital camera to a graphics board so that the graphics board can act like the camera for storing and processing image data in real time. AutoCAD Free Download can use a FPGP board to capture images, and display them on its screen. AutoCAD 2013 no longer supports a user interface for drawing on a tablet (e.g. Microsoft Surface Pro). History AutoCAD was first introduced on June 22, 1988 as a set of extensions to Autodesk Inc.'s "Dynaset", which were distributed as shareware. The original version of the product was called Autodesk DWG Viewer. It was the first application to support importing and exporting of the Autodesk DWG file format, introduced in 1988. A commercial product called Dynaset Viewer was introduced in 1989 and was the first commercially available viewer for the Autodesk DWG format. In 1990, Autodesk DWG Viewer was renamed Dynaset DWG Viewer, and it was available as shareware and was sold by Autodesk. The product was available for MS-DOS, Windows 3.1, and Windows NT. The company started to sell the program for \$15, which at the time was quite expensive. The product was bundled with a conversion tool (DynaView) that could convert DGN files to/from DST (the predecessor to the Autodesk DWG format). The DGN format was introduced in 1991. In 1992, Autodesk released Autodesk DWG Viewer, an integrated viewer and conversion tool. Autodesk DWG Viewer has since been updated and improved and is still used for working with the Autodesk DWG file format. The viewer supports layers, blocks, baselines, cross-sections, surfaces, and other drawing objects. AutoCAD 2007 was introduced on July 22, 2005 with the release of AutoCAD 2007. The final version of AutoCAD was AutoCAD LT, released on November 9, 2005.

AutoCAD LT supports a smaller subset of the functionality of the AutoCAD 2007 release, and was a low-cost, entry-level version of AutoCAD. AutoCAD LT supports both AutoLISP and Visual LISP. AutoCAD LT was discontinued on September 30, 2010. a1d647c40b
