Q: How to restore a file from Cloudkit private storage? I am trying to restore a file after it is lost. I used CloudKit to store the file. I then deleted the file in Cloudkit. Now I want to recover the file. I can access the cloudkit database via ckdb. The file is there but I can't find the path to it via the ckdb. I don't know if the file was stored in private or public storage. Is there a way to restore the file via CloudKit? If not, is there a way to retrieve the path to the file via ckdb? A: From CloudKit Quickstart: If you delete an item from iCloud, you can restore it from the CloudKit Dashboard. The item you wish to restore must have a reference in the Dashboard, and you must have permission to read the item in the Dashboard. You can also go to the Metadata view and look at an item, then click the Restore button. Eric Wells: We think it's more than just "just a distraction" For the past few weeks, we've been witnessing a fairly unprecedented attack on the political norms of the United States. There's been a steady stream of revelations about the Trump campaign colluding with the Russian government, for one, and a number of other major scandals in this administration. The latest revelation, of course, is the one about Trump's personal lawyer, Michael Cohen,
