DVD Chief is a professional software solution designed to help you organize your movie collections into catalogues. It automatically gets all your necessary information from an Internet database. Although this app boasts many configurations settings, it sports an intuitive interface and a clean layout that can be easily mastered even by beginners. The app is able to connect to IMDB database and to displays all added necessary details about the movies, such as release date, rating, genre, studios, plot outline and other useful information. You can edit movies on the go as the app provides separate fields to work with (e.g. cast and crew, edition, discs, media information, text, images and connections). With DVD Chief you don't have to worry about adding information about films when inserting a DVD, Blu-Ray disk or ISO image. It can automatically insert all details into their corresponding fields. You can sort films by title, collection status, release year, number, media format, rating, and filter them by seen or unseen, TV series, loans and many others. The app comes packed with a powerful search engine that allows users to find any movies in the collection pretty quickly. You can perform searches by specifying title, status, runtime, IMDB rating, genre, studio, tags and so many other options too. Playing the trailer directly from the app's window is also possible. It creates reports for each movie that can be exported to various file formats (e.g. PDF, HTML, RTF, ODT, plain text and others). Furthermore, the app allows users to add bookmarks, encrypt the movie database by setting up passwords and to customize its appearance by selecting from various themes. You can also choose what statistics should be displayed by selecting from different preset categories (e.g. genres, countries, rating). To sum up, DVD Chief is definitely a powerful tool that can help you organize your movie collections efficiently and quickly.
