Ushahidi Hack Penetration Camps - 9/9/08 Point of view: Chetwood. Sides: Philip. The attack was carried out on April 17 2008, shortly after the successful Ushahidi/D'Ambrosio/Wikileaks Web jam. Creative Commons Attribution Share Alike. Ushahidi Hack Penetration Camps. On September 9, 2008, hackers accessed and took over a dozen systems on the Ushahidi applications server. The data was from their Ushahidi anti-corruption and human rights applications and was released publicly through a blog on the hacker website Pastebin. The Ushahidi Group, led by Mwenda Ndiva, then contacted Steve Ragan, founder of the Ushahidi project, and later identified internal security issues. Mwenda Ndiva was arrested on September 12, 2008, and placed in an Ethiopian prison. On December 19, 2008, the Kenyan Government filed a criminal complaint with the Federal Bureau of Investigation (FBI) seeking arrest of Mwenda Ndiva for terrorist acts and hacking into government computers. On June 11, 2009, the Corruption and Democracy Network, a Ushahidi partner, published a report in conjunction with the Center for International and Strategic Studies at US Army War College entitled "Ushahidi Web Jam: Expanding the Map of Corruption". In 2018, a team of three
