---

you're trying to find out what happened to your girlfriend Yuna. She started to disappear one day, and you want to find out why. Today, you have found a weird device in your room, that you decided to take. Not knowing what it is, you press the power button... You enter a strange world. A world where you control characters that are stuck in a game. You start the game and you have to solve puzzles in order to find a way out of the game. DEEP SPACE WAIFU: FLAT JUSTICE - THE GAME: The game itself, is full of dirty jokes and porn references. You have to play through the game and solve puzzles in order to find out what happened to your girlfriend. When you finish the game, a nice sound track will follow. This track contains music from Deep Space Waifu Soundtrack vol 1. There you have the base track with all the heroes. If you have the previous track, it will tell you which characters are in the game and will give you hints. System requirements: Intel Pentium 6600 @ 3.2 GHz / 2 GB RAM / DirectX 9 Xbox 360 (60 Hz) Original Soundtrack: + full sized album + V 0.8 AvailableQ: LINQ GroupingSelect and Where? I am trying to get the number of clicks by group. I have a list of objects that contain a status and I want to show number of clicks per hour by group. The status is a string and is between 0 and 1. I want to group by hours but I have no idea how to combine a group by with the "where".  

```
var query = from rec in DataContext.Tasks select new { Date = rec.Date, NumberOfTimesClicked = rec.Attivita.DescendantGroups().Where(x => x.GetValue(0) == "0").Count()?? 0, Hour = rec.DateTime.Hour
```

## **Champions Of Breakfast Features Key:**

Collect things
