"We worked closely with the teams at EA Sports on the development of the all-new technology," said Karl-Magnus Schulte, Senior Vice President, International Electronic Sports Federation. "The results are exciting and we believe this new HyperMotion technology will further improve the realism and authenticity of FIFA's football players." In addition to this new, FIFA-realized motion capture, players will also benefit from an all-new FIFA animation and physics engine powered by the Ignite game engine. For a deeper dive into the game engine and in-depth details about all its new features, head over to IGN's new Game Engine Reveal page. "The success of our "Real Football" concept, as well as the commitment of the entire FIFA team to deliver the best gameplay experiences to our fans, has driven us to develop the best features together with EA Sports and other sports titles from the FIFA family," said Robert Gauthier, senior vice president of EA Sports. "We are passionate about achieving the right balance between capturing the authentic feel of real football and nurturing the developers' creativity. The FIFA 22 engine delivers the next-generation features, technologies and tools our team can use to push forward their game development." FIFA 22 builds on the momentum from last year's FIFA 21, the top-selling sports title of 2018 worldwide, with the addition of the following new features: Improved Ball Physics : Players are more fluid and agile when dribbling, balls have a more realistic behavior and drop more consistently on purpose and off the turf. : Players are more fluid and agile when dribbling, balls have a more realistic behavior and drop more consistently on purpose and off the turf. Adaptive Player Animation: In real life football players change their mobility with every movement. Their whole body is involved, with each limb reacting and adapting to every change of direction. What's new in Fifa 22:

- **Follow your club's journey to glory with a true-to-life journey across 3 distinct competitions; Champs League; UEFA Champions League; and FIFA Club World Cup**
- **New Artificial Intelligence (AI) - FIFA 22 introduces a brand new AI system that is detailed, smarter, and more unpredictable, creating more incidents, options, and tactical movement.**
- **All-new Touch controls - a progression of the new Modern Player Controls (MPC) engineered for FIFA, featuring responsive, accurate and precise ball control that will make FIFA 22 control feel more natural and responsive.**
- **New Word Balance - The biggest update to Word Balance since 2002 allows players to check the nearest wall, i.e. a defender, to get off the ball and fast-break on. If the defender has to run away, he'll have to carry the ball, creating more breaks.**
- **Brand new Skill Game - The biggest addition to the Skill Game is "PSG Assist", an evolution of Reading the Game. In PSG Assist, players have a visual indication which team is the ball carrier, and who is the target. Prepare your shot right. Set-up the right-footed shot. The player will know when it's time to take the shot.**
- **Receive passes quickly and smoothly. You will finally be able to cue a player's pass without having to reposition your shots. In previous games, players automatically automatically returned to their position when receiving the pass, confusing players and slowing gameplay.**
- **Collect the Ball Fast - Optifootball Short Pass allows players to control the ball as it is arriving on the ball using the right foot. As the ball arrives, players can adjust their pace, direction, and style as they would like, positioning themselves comfortably to receive the pass. This will ease players' transition and increase the speed of their game.**
- **More tech timing. Future Moves and Counter-Attacks allow players to switch to a new decision as their squad is heading into a specific action (i.e. 1v1) and use a different tactic. Further complicating gameplay, they can then change their plan during the same action by using the right stick to switch to a new decision on the fly. This will create even more tactical decisions based on squads features in the**

FIFA is the world's leading videogame brand. The game was launched in September 1992, has been a No.1 global franchise ever since, and is played by over 300 million gamers around the world. FIFA is the most globally recognized football brand in the world. The FIFA brand is owned by EA Digital Illusions CE, a wholly-owned label of Electronic Arts Inc. Play FIFA in new ways Utilising the full potential of Frostbite™ technology, FIFA 22 brings even more dynamic gameplay than ever before with new match-day features, enhanced physics and collision systems, and new animations for player traits, on-pitch behaviour and the crowd. Plus for the first time, you can play in 4K, including ultra high-definition. New 'Street Pitch' AI adds more competition Street Pitch is a new feature of FIFA that gives AI-controlled teammates and opponents more impactful decisions and more realistic decisions in-game. With Street Pitch, teams will face-off in a more realistic and unpredictable street fight, in which the AI team will abandon their standard tactics and play a full 90 minutes instead. New Moments The 'Moment Generation' feature introduced in FIFA 20 is back, and now gives you more ways to create your own, with a new variable-length match mode. Intuitively control the game flow and add unique moments into your best matches to turn them into unforgettable memories. New 'Moment Generation' features include: * Pace Index - a perfect indicator of match intensity on the pitch. Pace Index builds and gradually increases in intensity, and can be increased or decreased for a specific period of time. * Individual Moments - For the first time, create and share individual moments. For example, when a player's off-target shot comes back to haunt him just as his moment is about to start, there's more scope for players to shape their creativity, which could result in a unique player moment. * Off the Ball - Talk to your players about off-the-ball movement, and watch their creativity evolve. This new off-ball player action can have a huge impact on the entire match, making you think differently and delivering the feeling of the player/player interactions. * Dynamic Weather - Slushy snow, lightning, sleet, rain and much more can change the course of a match.
