See the field's feature, step by step usage guide: - From my website, you may download data by pasting the following URL: Once the form is submitted, in a few seconds you will receive a string (variable 'login key'). The string is the API Key that you need to use for subsequent visits To download data, instead of form you can use following: GET /p_api_form?login_key=Your_API_key Please, do not send the form to me as I do not have any control over the data you are requesting. Any request received by me through the form, will generate a fake data (i.e., not actual data) In case you want to manually monitor the performance of your data in a separate tab. You can access your data through your own browser. You can then check for GET request made by my service and parse the data. The following are the most recent major versions of GetBhavCopy: v3.1: Linking to another site - API is now fully RESTful, so linking from any source is now a breeze! v3.2: Fixed fatal error in previous version. v3.3: 1) Implemented API versioning. 2) Implemented new data permissions. Please, see the next version(s) for further enhancement! v3.4: 1) Using the new setUpAuthedURL method, permissions are now handled correctly. 2) Upon successful login, you will be automatically set up as the logged user. 3) No more need to parse the data manually. v3.5: 1) Now support multiple URLs for each data source. 2) Maximum request is 5 per URL 3) Maximum number of requests per
