Ron is a platformer game which explores a vast world to free himself from deadly traps, solve riddles, interact with objects, find coins, unlock new worlds and escape from bosses which are sometimes not as easy as they look. And while trying to reach the goal of this game, the only thing he thinks about is his dignity. For the human, he is trapped in the body of a mutant pink monster with a huge crush. And to let you be immersed in the game, I decided to take away all of the details that would distract from the enjoyment of playing, but if you want to know more, the gameplay should be enough for you to get into Ron. - Ron App available for Windows, Android and iOS. - Register and play for free! - Highscores in Google Play and Game Center! - Full Retina support! - Showcase in the Google Play Store! - In the Google Play Store and Game Center is the current best player in the charts! - Global Leaderboard: appear in the official Google Play leaderboard - In the Game Center, you can share your experience and see the scores of your friends from around the world! The Indivisible is the game of a portal that opened in the heart of the universe and in which the only entrance to the planet, that ended up being the only way to be able to pass through the last level to gain the freedom from a horrific supernatural prison, was just 50,000m to the left. This was just one of the many terrifying threats that we could be faced with in this new planet, but with every turn of the second, we became more scared, more confused, because we saw that this place is not as orderly as we imagined and there is something there that has us in his way. From time to time we saw the appearance of different beings, from beings that looked like humans to the strangest creatures that could appear in the worst nightmares of a human being, but we knew well that there was nothing there that we could call us vulnerable. After many hours, many turns, many deaths of ourselves or our companions, we managed to continue for many more hours, to find the exit and go to another place of which we knew nothing until then. Ronald the big clumsy monster loves to watch TV, he says, but he just can't know what the remote controls for the TV he was watching. What happens? The monster falls asleep and wakes up on a funny fantasy world, full

BEAST STYLE Games describes "The End" as "a not very nice story." But what is it? "The End" tells you, after long absence... Story of Puppy in Dark Universe is full of fantasy, it tells the story of four children, Aric and other three companions of the "Monster" Simon. It is a story full of obstacles, hard work and the desire to become a great hero. Story of Puppy in Dark Universe is about a man who wants to get stronger and become better. You can help him to do this. You can give him wishes and earn experience. If you want to earn gold you have to destroy the barrels, grab the rats and kill them. But you have to be careful, because if a rat hits you, you will die. But if you are successful and earn a lot of money, the most important thing will happen to you. Want to unlock a key? Find everything you need? Complete all tasks? Find all secrets? Feel that you are ready to step on the battlefield? Go ahead, smash away. There are a lot of enemies to fight. But you have to be careful because the "Monster" Simon has tricks. He has fireballs, a bunch of rockets, whirlwind, spiders and other terrible monsters. What's new in Partless Ron:

cherolle Partless Roncherolle is a chocolate-covered hazelnut spread produced by Nestlé in Switzerland. It is often confused with its French equivalent, Lebkuchen, although the latter is a caramelised and fruit-flavoured version of this product. It is made out of roasted hazelnuts, sugar and cream. The spread is marketed under the brand name "Chocolat parti". It is characterized by a creamy texture with a soft meltaway centre that is unlike other grocery store-brand hazelnut oils. History The idea of the spread came from Jean Pierre Grappin, Director of the Nestlé's factory in Valentigney, Dijon, France. He came up with the idea of turning the paste of roasted hazelnuts and sugar into a spread. The spread was first made available in the 1930s, and was originally marketed in France as paste de noix. The spread was initially manufactured in Dijon and only became widely available in Switzerland in the late 1950s. In 2000, it also started being manufactured in Vietnam. Product description Name The ingredients of the spread are hazelnuts and sugar. The product is commonly called Lebkuchen by most people; however, it is a shortened version of the German name Lenzkuchen, which means nuts of the bird cage and refers to the shape of the brown Nüsselschip, a chocolate chip cookie that resembles a bird cage. Elsewhere, the name is shortened to Roncherolle. The English name is Peanut butter. In all of these languages, the name is the plural of Roncherolle, which means nut roll. Ingredients Nut roll: hazelnuts, butter, confectioners' sugar and eggs, emulsifier (milk protein) Spread: hazelnuts roasted with sugar Nutritional information Nut count (per 100g) Energy: 205 KJ (48 kcal) Fat: 10 g Protein: 2 g Carbs (total): 15 g Sugar: 15 g Fibre: 0 g Overview The spread is characterized by a creamy texture. It is richer in fat than Nutella and Nutella-style spreads as a whole. It is often characterised by a rather soft meltaway centre unlike other grocery store-brand hazelnut oils, which
