Up to the Challenge of Elden Knights!

HIGHLY RECOMMENDED

Think back to your first RPG, perhaps it was Final Fantasy VII on the Super Famicom or Final Fantasy VI on the PS1. If you remember, it was the combination of an interesting story that had you rooting for your heroes and the exhilarating combat that soars with every degree of freedom. It was a world of teamwork and camaraderie.

HURRAH!

The team of Farland Studio has dragged out the chains of meat on this RPG adventure and all the curtains have been dropped.

You've been caught off guard.

Graphics 7.8 Gameplay 8.0 Lasting Appeal 8.2 Overall 7.8 From PCT IGN 8.0This game is everything a fantasy quest should be. It's full of combat, dungeons, loot and what not. This game is for the hardcore fantasy gamer. If you're a fighter, this game will fit your playstyle. I was a little disappointed though that you can't use your weapons to attack until a. Hey, you can't attack a locked door, so what's the point of attacking a locked door? You just have to use your fists to bash it. It would have been nice if you could use your weapon first and unlock the door when you can't fight with them. Not even the Dual Wielding option really solves this issue. Anyway, here is some spoilers. There are 7 types of "Magic" in this game. You can use magic to do damage and to heal. When you use magic, you'll be able to see green and blue lines behind you. These are magic markers. If you're going to use a spell, you'll have to charge it first, by holding down your Ctrl key. When you're in combat, the world turns blue. This means that you're not supposed to attack other party members. You can only attack the blue monsters. You can't attack the doors. So you're going to have to use melee if you want to kill your enemies. The best way to do this is to use Magic Marker. When you hit a blue monster with magic marker, you'll gain a blue buff. These are called the "magic spark". It'll let you gain speed for a short time. When you're healing yourself, if you hold down left Ctrl key, you'll heal yourself more. When the magic spark is white, you'll heal yourself at a higher rate. If it's blue, you're healing yourself at a slower rate. So once your magic bar fills up to the max, you can heal yourself. If you want to heal someone, you have to target someone with a Magic Marker. The color of the Magic Marker will indicate who is a target

What's new:

As both online and asynchronous elements, a “Friend” can be added to one’s list of “Alive” friends, whether or not it has been confirmed as “Real Friends.” The list can be sorted based on the interactions made in “Online Reality,” which includes not only “Offline” or “Party” chat, but also “World Chat”.

A special icon now appears when an Inactive “Friend” is added. Uniquely, the Legacy Avatar appears when you have a game actively taking place, and a Material Avatar appears when you start a game as an Inactive “Friend.”

Update: New Fantasy Action RPG will be available on iOS, with additional iOS versions planned for North America, Europe and China.
