I tried googling but no luck, also tried with `file_get_contents()` but it does not seem to work. Here is the code: `$url = '';` `$filename = 'example.html';` How would I get the source of the example.html file? A: try this, it will work for you. A: You can use `file_get_contents();` `$source = file_get_contents('');` `echo $source;` A: It is pretty simple: `file_get_contents('example.html')` You don't need to grab the source in any other way.
