What's new in Tree Trunk Brook:

is a three-volume manga series by Masato Koga. It was originally serialized in Shueisha's Weekly Young Jump and was later collected into nine volumes. **Plot** The series focuses on the adventures of the megalomaniac inventor Hiyori Uzuki who did not inherit his father Hiroshi's genius mind as expected. In reality, as his childhood friend Miyuki Miyabe finds out, Hiyori's younger sister Yuzu chose his over her. This was because she wanted to get away from the wealthy lifestyle of Miyuki's family and Hiyori needed money for his inventions, but in order for her brother's deeds to come true, Yuzu gave her life to a tablet with the life force of Hiyori. This increases the amount of energy being output by human brains. This effect is not reversible. This begins a series of stories where Hiyori's sister Yuzu continues to pursue her former lover Miyuki but his father refuses to allow him to have any type of relationship with his daughter. Miyuki tries to help Hiyori become as genius as Hiroshi was, but this only damages Hiyori in the end. Volume one ends with the deaths of Hiyori's parents and Yuzu, who was taken under the custody of Hiyori's sister's husband, while Miyuki finds Yuzu's tablet. Volume 2 and 3 continue Hiyori's adventure with the two remaining search parties. Volume 3 ends with Miyuki discovering Yuzu's body and a new discovery about Hiyori's brain. **Characters** **Main Characters** Hiyori Uzuki A genius of the highest caliber who possesses an unnatural aptitude of invention. While he is a natural genius he is arrogant towards those around him and thinks he is above others, and tends to be quite disdainful towards the existence of others. His intelligence is off the scale. He is often mistaken for a genius, but he is clearly a tad bit insane. He also sometimes remarks that he should only be called the genius and everyone else should be what he calls "varieties". After his parents' death he lived in a mansion in Akachiyo, in Odaiba, with his younger sister, Yuzu Uzuki. He invented many inventions which are proven by the new York Times of the original form of his invention which was actually an invention used for faster transportation. His invention is known as the Hiyori-
