relates to a method for evaluating a R-T-B type rare earth magnet alloy and a method for producing a high energy product and large remnant magnetization rare earth magnet. 2. Description of the Related Art Practical magnetic properties as permanent magnet materials for motors and so on depend on several properties including coercive force, remnant magnetization and thermal stability (i.e., maximum temperature at which a variation of remnant magnetization with temperature is maximum). Particularly, a big energy product is indispensable in high-speed motors for computers and so on. It is known that the maximum temperature at which a variation of remnant magnetization

with temperature is maximum is inversely proportional to a crystal grain size of a R-T-B type rare earth magnet alloy and the energy product is proportional to the maximum temperature at which a variation of remnant magnetization with temperature is maximum. It is also known that when an amount of (Tb, Dy, Ho)₂SiO₅ as phase giving rise to soft magnetic properties is controlled, the maximum temperature at which a variation of remnant magnetization with temperature is maximum can be increased to near the Curie temperature (T_c). In producing an Nd

Three people were arrested at a demonstration at Bascom Resources' on Parr Lane, near Holbrook, while two were taken to separate police stations. Police say the two were arrested on suspicion of trespassing and obstructing a highway. More than 30 police officers were called to the site during a protest organised by Northwich Against Fracking. The protesters had to be removed from Bascom Resources' site on Parr Lane, near Holbrook, and taken into Cheshire police headquarters in Crewe. They were arrested on suspicion of obstructing a highway.Q: Navigating to Xcode's Build Settings using UI Automation What I need to do: Use UI Automation to click on the Build Setting's "Debug" button. What I tried: I am not even sure why I'm using UI Automation and not just the GUI way. I read that the Xcode button bar is not accessible. However I'm using Xcode 9 beta. Everything I found online was using the GUI way, and I wanted to use UI Automation. Is it possible to do this with UI Automation? Xcode version: 9.1 (9B55) A: As you have already found out, its not possible with UI Automation. You could try to click the icons on the toolbar to navigate to other areas in the UI. For clicking specific buttons in the toolbar, you can use: UID
