
Windows 7 Starter Snpc Oa X15 53817 Free Download !!TOP!!

Windows 7 is a successor to Windows Vista and it is the second release of Microsoft's Windows series. It is an evolution of Windows XP and the previous Windows series. When Windows 7 is launched, the professional users will be prompted to upgrade their previous Windows version to Windows 7. Windows 7 Starter has the basic and minimal features and is a good Operating system for new and beginner users. Windows 7 Starter provides a pre-installed applications to help user to use the Windows Operating system. Some of these applications include Microsoft Office 2007 and Microsoft Internet Explorer 8. A look on the new features and apps will lead you to know about the basic features of Windows 7 Starter. With Microsoft Office 2007, user have an ease access and user-friendly interface. This upgrade includes four Microsoft Office 2007 applications namely Word, Excel, PowerPoint and Access. These four applications can be used to perform various tasks on the Windows Operating system. Microsoft Internet Explorer 8 has changed the look and feel of the previous series. It has found a way to ensure that no malware or virus can contaminate the system. This new feature is known as the Smart shield that can be found after installing the Operating system. At the moment, there is not a change to the Smart shield for the Windows 7 Starter. Some of the new features for Windows 7 are Smart shield, added Windows 7 customer care update. The added Windows 7 customer care update is in line with the upgrades like Windows Vista. The update enables you to receive and send messages from Windows Live Messenger 7. Also, there is the ability to control the text size, location of form text, and text size of live chatting messages. The Windows 7 SP1 service pack 1 has an ability to provide Windows Live Messenger 7 with an ability to support the identity of Windows Live Spaces, an service offered by Windows Live. The Windows 7 SP1 service pack 1 enables users to use Windows 7 to access applications on Windows Live Spaces. However, this upgrade does not let you integrate Windows Live Messenger 7 with Windows Live Spaces in a way that you can access your conversations from the desktop. It also enables to be able to switch between the applications at the same time using the Windows 7 Start button. Some of the other added features
