TOEiTOiTOi "Finally, a fantasy game where I can actually fight myself." 1854 # 18 The Good The story is really good. It captures the feelings of a hero in a dark world. And it feels really tough. There's no part of the game that isn't honestly challenging. But the game doesn't go overboard with intensity. I really love how every battle is different and has its own story and situations. It's like the epic fantasy movies, only with a

---

system. At first, it was a little confusing and sometimes kinda boring. But the story really picks up in the second half. And I won't even lie to you, if you manage to unlock the main story, it's really, really epic. I love the combat system. It's really satisfying. You can equip each and every item from the game. And you can level your equipment, customize each weapon, armor, and magic. The combat system was really refreshing. You just keep leveling as you go along. The graphics are really good. The environments look really detailed and awesome. It really brings the world to life. The enemies have a lot of different animations and they're really crazy. You'll have to use your mind to attack them. They will do a lot of combos that make it harder to dodge. I'm really impressed with how the game just looks like a fantasy RPG. But it also kinda looks like a movie and it flows really well. The Bad The camera might have been a little awkward at first. But after a while, it's a lot better. It's a little weird sometimes. But after a while, you get used to it. The graphics are really good, but I miss the 2D. It kinda makes me want to play an RPG with 2D graphics. The monsters are good. Especially in

---

the final boss fight, it's really tough. But the story took me by surprise. As I was looking forward to the story, it was a challenge, but I was really glad that the story turned out to be so epic. OVERALL I would rate it a 5/5. It's a fantasy game where you can defeat yourself, and it's really, really fun. So I highly recommend it. DEVON PEABODY "I'm having an impossible
