What's new:

Center The Golden Fall Center is a multi-purpose arena in the Los Angeles suburb of Santa Clarita, California that opened in 2008 and is home to the Western Athletic Conference (WAC) basketball, volleyball and most notably the Santa Clara Broncos. The arena was built with a cost of \$96 million. It features a total capacity of 14,647 spectators, and was designed to incorporate its neighbor, the 5,700-seat King Fahd Sports Complex and Arena District, on the southwest corner of a 10-acre campus. The arena opened on October 10, 2008, at a cost of \$96 million.

History and naming In 2004, when the Bronco's ownership group purchased the Los Angeles Thorns of the Women's National Basketball Association (WNBA), the Bronco's Board of Directors decided to find a new venue for their women's professional basketball team. After meeting with the owner of the Hollywood Palladium, they inquired into purchasing the Hollywood Sports Arena, although they were told that the Hollywood City Council had decided to demolish the Hollywood Palladium to make way for a new hospital/medical campus, which had been approved for construction. When searching for a new home, the basketball board set their sights on the suburbs, and the Santa Clarita Valley district of the new housing complex of Palisades Estates. The team had played at the Pacific Life Dome, an open-air facility on the campus of Santa Clara University that had hosted basketball games since 1982. After the explosive growth of the University, there were not enough seats for their supporters, and they also had no indoor arena, therefore the Pacific Life Dome was deemed too small. Construction began on the local high school football field in 2002, although it was not publicly disclosed at the time. The stadium sat 950 during construction, as well as 700-800 football bleachers. A newly constructed, two-level, 1,000-seat, open-air, restaurant zone was built over part of the football field, which was first considered for possible expansion of the school's football stadium. The arena district, which had

been approved in 2004, was developed on and was expected to include one large arena and a much smaller practice facility. It was announced that Vornado was the general contractor, doing the work for the City of Santa Clara, using mostly modular construction. The stadium was to be their seventh modular building. In 2005 and 2006, donations were made to the original by the Santa Clara Arena District
