One of the most interesting aspects of Luminous Arc 3 is the new ways the game explores relationships between the characters. For example, in the parallel dimension, the amazonian tribe Kelp where each seer can "read" almost everything written in books that are located in that dimension, and then thanks to a specific skill can learn to understand the origins of that writing. Turei was a member of this tribe, and was able to read the texts about the elements. By using a special attack, the warrior Kohaku, he reads the amazonians for the first time with the origin of his element and is able to understand the connection with him. On the other hand, being a female character, Elle is a warrior but her element is water. Despite that, she is still able to read the texts because the element has added a resonance to her mind. This mechanism has several consequences in the plot of the game. The worst of them is that, in order to learn more about the other dimensions and about the origin of the elements, characters sometimes need to fight each other. On the other hand, these clashes make it possible to learn more about the other characters and sometimes even lead to emotional situations. Special Abilities ... Ability of Law and Order — Levi ... Climatic Enigma — Kohaku ... Pull of True Elements — Copen ... Law of Aridity — Lola ... Light of Transfer — Elle ... Elemental Identification — Turei ... "Spiral of Time" Telepathy — Elle ... Ability of Recollection — Kazuhiko Finally, while the translation is in English, they still have time to polish the game, so expect a lot of improvements and bug fixes.
