Nurettin BLC, Erdem ERCAN. <http://www.oecd.org/tax/crime/47425987.pdf>, (17.01.2017) This thesis addresses the question of how financial intermediation influences the creation of small firm networks. Using statistics on Estonian travel agencies as a sample, this study uncovers the relationships between the number of employees, the total number of firms, and the number of employees with family business and the numbers of employees who own business alone or with others. The data cover the period between 1995 and 2008. It is argued that the number of employees with family business is the most important factor influencing the formation and development of a network of small firms. The effects of the number of employees with family business on the number of employees owning a business alone or in partnership is more limited. <http://www.das-rundfahrzeug.de/wp-content/uploads/2013/11/Nurettin-Bilici-Kamu-Maliyesi.pdf>. <https://citytalk.com/property/25895/pdf-shared-by-nurettin-bilici-kamu-maliyesi-dargil-maliye->.
