My friend i recommend the Automatic Save Game Editor (Save Game Editor) it does just what it says in the title. This program is free to use with no time limits and with no registration needed. There are no other programs that can do this, this is the only one. You can use it with your Windows and Mac Operating Systems. There are many benefits for the user of this program and i will be listing them here. Page 1 If your left clicking your mouse is not working properly you will need this automatic Save Game Editor. My friend it will work on Windows XP/Vista/7/8, MAC OS X or Linux. There is no compatibility with other Operating System. In a way it is perfect for all of us but there is one problem which is not my fault. The program should be installed on both your computer and you game. For me when I install it on my computer it works and works fine but when i install it on the game and try to use it it stops working and gives me an error. I have to reinstall it and this takes a lot of time. Maybe this will be fixed by an upgrade, I have tried it and it is still very stable. My friend i am not a expert and i do not try to be here. I am just trying to help people and hopefully make life easier for everyone. There are many other programs like this. I have done a little research and i found 3 programs that are close to this Automatic Save Game Editor, but none can do everything this one does.
