What's New in the Boeing 737-300 500 Systems?

The Boeing 737-300 is a single aisle medium range jet airliner. With a maximum capacity of 210 passengers, this aircraft is mainly used for medium to long range flights. It is powered by two Pratt & Whitney JT8D-9A turbofan engines producing a combined maximum of 24,900 kgf (56,340 lbf) thrust. The standard payload is 16 tonnes, it can accept up to 34 tonnes. The Boeing 737-500 is a double-aisle long range jet airliner. The Boeing 737-500 is an updated version of the -300 model with slightly larger fuselage and a different wing. The fuselage is longer by 10.1 ft. (3.0 m) and the wingspan is increased by 1 ft. (30 mm). The maximum capacity is enhanced by 200 passengers, bringing the total to 250 passengers, and the maximum take-off weight is increased to 165,000 lb (72,000 kg) from 156,000 lb (68,000 kg). It is powered by two Pratt & Whitney JT8D-9A turbofan engines producing a combined maximum of 28,600 kgf (65,100 lbf) thrust. The standard payload is 15 tonnes, it can accept up to 31

tonnes. This Boeing 737-500 Systems exam questions quiz tool is intended to be used as a tool to test your understanding of the -300 / -500 systems, aircraft systems and the various subsystems that make up these aircraft. Boeing 737-500 Systems quiz tool is designed to make it easy for you to take the time to prepare for the pilot licence test (both commercial and type rating) at a more leisurely pace.
