(composite) title: (English title).The role of serotonin in the regulation of gastrointestinal transit. The current understanding of serotonin (5-HT) physiology is reviewed, and a proposed framework for the regulation of gastrointestinal transit is proposed. The regulation of 5-HT by changes in luminal 5-HT concentration is facilitated by the existence of 5-HT1,5-HT2 and 5-HT3 receptor subclasses. 5-HT decreases intestinal motility by stimulating enteric inhibitory cholinergic neurons via 5-HT3 receptors in enteric nerve terminals, decreasing peristalsis and increasing intestinal transit. 5-HT increases the delay in gastric emptying via 5-HT
