PC World reader Jasperz told us his PC has been very sluggish lately. He tried a variety of solutions, but none of them seemed to work, so he gave up. He then saw our article on how to speed up a Windows PC and followed our advice. Now he has his machine running like a charm. The article explained how Jasperz could make his Windows 7 machine boot faster by adding registry keys and disabling unnecessary startup programs. Jasperz had been getting frustrated with the slowness of his Windows 7 computer. "I've had Windows 7 for over two years now and it was so sluggish that it sometimes would take five minutes to boot. I had to frequently reboot to get things done. In fact,

most of my antivirus applications would just reboot the machine during a scan.” “I was very frustrated because I wanted to speed up my computer, but I couldn’t do anything. I had read that you can delete unwanted startup programs and add registry keys, so I went in and cleaned everything up.” PC World reader Jasperz was able to get his computer working much faster by cleaning up his system. Jasperz began by opening the Windows Task Manager. He then opened the Startup tab and deleted all of the processes that didn’t have a file or folder associated with them. He then opened the Run tab and navigated to the Windows\System32\config folder. He opened this folder and double clicked on the REG file. After doing this, he returned to the Startup tab and deleted the entries that were unnecessary, some of which were invalid. “It took me 2edc1e01e8

What's New In?

If you're looking for a quick and effective way to clean up your PC, you should try out iSumsoft System Refixer. Featuring a no-fuss approach and a somewhat streamlined UI, it will help you

perform a comprehensive scan of your PC's various problematic areas, including cached files, invalid registry entries, invalid extensions and invalid DLLs. In a nutshell, iSumsoft System Refixer is a decent cleaning utility that can help you maintain a smoother Windows experience. The app is available at no cost and can be downloaded from the program's official website. Ddif is a Windows Disk Cleaner, which allows you to scan and clean all the data on your drive. After scanning, it will show you all the items to delete, and where they are located. * These are not the results of your virus scans. They are the result of running the program on a particular machine. Your data may vary. Warning: using any of the commands or functions of this software is at your own risk. Command and function names are explained in an on-line Help file. The program adds or removes boot managers as you need. You can now boot into Win98/ME/2000/XP or Vista/7/8 or Linux from the same boot device, when you use different boot manager. And also you can boot a Windows or Linux from the same boot device, when you use different boot manager. Fantastic feature! This program keeps changing from the official site to another one. Great value for money, most of these boot managers are only \$20.00, and no need to buy the whole one. Let's check some quick tips of the boot manager utility: 1. Data recovery-- it is a software that allows you to retrieve deleted or lost files. It is powerful enough to recover data even from a drive which is corrupted or partition is damaged. 2. It detects hard disk volume changes to prevent data loss. The program will update the program list automatically to let you know about new version. 3. Quick and easy to use. 4. Let's the program scan your boot sector to check if any invalid boot-identifier was detected. If you have some boot-identifier error, you should delete the boot identifier from the registry. 5. It scans your system hard disk and checks for invalid files. It allows you to quickly scan and remove such files by just dragging them to the bin. 6. Your computer will reboot when the program is running. No matter what the current operating system is, you can choose to reboot into the desired operating system. 7. The program has a full-featured interface which is easy to use. It has a built-in command line utility to make command line operations easier.
