We have collected the best apps for Windows 7 in one place so you don't have to go to various sites to download apps. Here is a list of best apps for Windows 7. Enjoy the list. What is Windows Essentials for Windows 7? If you're thinking of purchasing Windows 7 for the first time, you might want to consider the free software package that Microsoft provides called "Windows Essentials". Windows Essentials includes a handful of apps that come pre-installed, like the Windows Update client, which provides a way for the user to automatically install patches and updates for Windows, as well as the Messaging client, which allows the user to send and receive instant messages from a single client. A few other apps from Windows Essentials are the Media Center, which allows you to watch and record video from a hard drive or network-attached storage device, the Photo Gallery, which allows you to add, view and view pictures, and the Windows Defender, which is a virus and malware scanner that allows you to scan for threats while you're connected to the Internet. You can run Windows Essentials on its own or alongside the regular Windows 7 operating system. It is a popular application that has been widely used since 1998. Mac OS X has Apple's Pages app that is similar in some ways to Microsoft Word, but it is also very different from the Word editor. The Apple Pages app, like Microsoft Word, is a WYSIWYG (what you see is what you get) word processor, where you can create documents and save them, and you can also share them with others, among other features. As a writer, it was an essential tool for me to create and create for content. Pages is one of the best software applications in the App Store. It has the basic document features you need to create documents that are professional and attractive. Pages has all the features you can think of to create documents. Just pick the page layout you want to use and start typing. You can choose from different page layouts, and your text will automatically appear in that layout as you type. It has different page layouts to suit various purposes, such as the script page layout, the legal page layout, the book page layout, and the article page
